

# SilkRoad Onboarding

## Release Notes

2018.1

March 2018

## New features and improvements

New features and improvements are summarized here. Need more details? Click [here](#).

Name	Tracking ID	Support Case	Description
 Attach an eForm or Uploaded document to a notification	RED-7563		An eForm, uploaded document, or download package can be attached to the task complete notification. To configure that attachment, the Manage Notification Attachment privilege is required.
 Display Event Name when specializing notifications	RED-12480		When specializing a notification on a task definition, the event name is listed to help identify the notification.
Download Package	RED-11452		A package of eForms and uploaded documents can be configured to be downloaded into a PDF by a user in a task.
Download Package	RED-12192		Download PDF has a table of contents.
Audit for Download Package	RED-12361		When the configuration of the download package is changed, there is an audit note identifying the changes that were made.
Engagement Center Link	RED-12653		If the Contact Support URL was not customized, the value was updated to link to the Engagement Center.
Administrator Name for eForms	RED-11496		An eForm administrator can set an administrative name for eForms. This name will be used in the eForm report and task definitions. This name does not change the name that is viewed in the Task Summary when a user is completing the task.
Audit for Administrative eForm Name	RED-12703		An audit note is added when an administrative eForm name is added or changed. These are displayed with the "eForm Builder activity" option.

# Resolved issues

## 2018.1.0

Tracking ID	Support Case	Description
RED-12458		Added a confirmation dialog when a notification is deleted.
RED-12478		Added the MISSING_ATTACHMENTS_LIST token for completed task notifications that should have attachments. For example, the eForm was opted out.
RED-12532		The PDF created in the document package task can be attached to a notification.
RED-12574		Corrected how the InsertForms privilege is evaluated when editing an event definition. Users without the InsertForms privilege are not permitted to set or edit eForms, uploaded document or download package on task definitions.
RED-12634		Addressed issue that caused extra notifications to be sent.
RED-12647	745983	Addressed issue that prevented updating category values on events when the current value was no longer a leaf node.
RED-12654		Improved the XML processing of the SOAP APIs to address an intermittent error "The ID element is not declared"
RED-12659		Improved the processing of I-9 re-verification events to ensure that the earlier date between the section 1 authorized to work until and section 2 document expiration date is used.
RED-12663		Addressed issue that caused uploaded documents with required attributes to not display on the employee profile.
RED-12671		Corrected issue where not all category values were saved when there are more than 20 category values are used on a task definition and the task definition is edited.
RED-12679		Corrected issue where the team filter on the employee report did not produce any results.
RED-12688	747508	Updated the processing of the DeleteForm API method to correctly report if there was an error deleting an eForm. eForms that are marked delivered "read-only" (1) cannot be deleted, because they are read-only. To delete eForms, they must be delivered "unlocked" (2)
RED-12693		Corrected issue that caused the \$TASK_LINK\$ notification to not direct a user to the task when clicked.
RED-12698		The PDF that is produced from with the Download Package will include a table of contents of the documents and eForms that are included in the PDF.
RED-12701		Addressed issue that caused eForms to not print when a non-printable control character was included in the eForm.

# Known issues

## Localization known issues

Issue	ID	Workaround
The first and last name fields do not swap positions in Japanese	RED-8219	None at this time.
