SilkRoad Recruiting Release Notes
v2020.3 | July 2020

New features and improvements

New features and improvements are summarized here. Need more details? Click here.

Module	Release Note	Key	Salesforce Number
ATS	There is now a Print button on the modal window that appears when you select the Requisition Details option from the ellipses menu on the Job Posting Details page. It prints all details shown in the modal window (window may be scrollable), including detailed information about each approver. Also, there is a Print option on the ellipses menu when you click Edit This Job option on the Job Posting Details page. It prints all details that can be viewed on any Edit Job Posting pages.	RND-405	
ATS Candidate Experience	We are deploying the updated OFCCP Disability Form CC_305. The update of this form was completed via 20 individual tickets (each ticket for a separate area in the application). This updated form is currently set to expire May 31, 2023.	RND-183

Resolved issues

Module	Release Note	Key	Salesforce Number
ATS	When a user with access to the Report Builder created a Job Posting Metrics report and clicked the Department Name Search button (which only displays if more than 100 departments are available), the pop-up window included the navigation menu. This has been fixed. The pop-up window no longer displays the navigation menu.	RND-1117	
ATS	Fixed an issue that occurred when a user with access to the Jobs Dashboard selected [All] from the View as Recruiter drop-down list. The Career Site Postings section of the dashboard did not display any data, and the Loading spinner continued to spin.	RND-680	

ATS	Fixed an error that occurred when a user was on the Candidates > Interview Status page then selected any option other then the default None option from the Group by drop-down, and then attempted to sort the results by clicking on the Requester or Job Title column.	RND-389
ATS	Fixed an issue with the validation of the required fields when creating a requisition or job posting. Whenever you did not complete one or more required fields (above the Job Description field), left the job description blank, and attempted to save the requisition or job posting, the system focused on the Job Description field instead of the first required field on the page. Going forward, no matter what required field is missing information, the system automatically focuses on the first required field.	RND-388
ATS	When you selected the Change Job option from the What would you like to do with this candidate? drop-down on the Candidate Resume Profile, some or all hiring stages displayed (varied based on the browser). This has been corrected. Now hiring stages are not shown when you first access the page and only display after a job is selected (regardless of the browser you use).	RND-387
ATS	When creating a requisition or job posting and the required Job Description field was not completed, the required field warning message did not display. This has been corrected.	RND-386
