SilkRoad Onboarding

Release Notes
Minor Releases for 2018.11
2018.11.1, 2018.11.2. 2018.11.3, 2018.11.4
December 2018, January 2019, February 2019

2018.11

API changes

This table summarizes changes available in the Onboarding API after upgrading to 2018.11. SilkRoad generally ensures that API changes are backward compatible so that previously built integrations are not impacted. Changes to method output are deployed with an XSLT that removes the additional output until the transformation is manually removed in the Onboarding user interface.

Tracking ID	Method	Description
		No additional changes at this time

Resolved issues

LifeSuite Libraries

Tracking ID	Support Case	Description
ACT-8310	00783048	Rolled back feature to force users to re-sign when a form is opened, and the user's details do not match an editable signature block. Will be re-implemented in 2019.1, allowing each signature to be opted into this feature.

2018.11.3

Tracking ID	Support Case	Description
RED-13591	00782444	Corrected issue that caused authentication failure when using "Roll out the Red Carpet" from SilkRoad Recruiting.

2018.11.2

Tracking ID	Support Case	Description
RED-13514		Font metadata for WOFF font files will be displayed on the Fonts tab.
RED-13406		When only one signature option is configured, the user signing does not have to click the button selecting the signature.
RED-13536		Addressed issue with how line breaks are forced when there is not white space and the page width will not fit the specified text.
RED-13501		Addressed issue where task complete notifications with Employee Profile merge strings and an attachment were not resolving the employee profile merge strings.
RED-13415		Addressed issue that caused PDF output of some reports to be oriented in portrait and not landscape.
RED-13541		Addressed issue where in some cases a task definition clone (because the assignee was changed) would not appear in the task hierarchy after saving the cloned task definition.

2018.11.1

Tracking ID	Support Case	Description
RED-13439		Each customer can add fonts that are used for the PDF printing of eForms. Customer added fonts for PDFs must be true type fonts, TTF files. These fonts must be acquired by each customer and assigned to each form where it will be used. (For details click here.)
RED-13451		Addressed issue that impacted updating an employee profile from the portal when the validation function changed based on where the profile was being edited.
