SilkRoad Recruiting

Release Notes
2017.7
December 2017

New features and improvements

New features and improvements are summarized here. Need more details? Click here.

Name	Tracking ID	Support Case	Description
Send Recruiting's custom fields to Recruiter Lobby	OH-34127		Clients using Recruiter Lobby will now have all their Recruiting custom fields sent over to SilkRoad Onboarding when initiating the Launch Recruiter Lobby action.
OFCCP Compliance text box to the Resumes page	OH-33785		Because the current Candidate Advanced Search page is being replaced with the Resumes page, the OFCCP Compliance text box has been added to the Resumes page. Clients that have this feature currently enabled for the Advanced Search page will automatically see that text box on the Resumes page.
Update Regions list for France	OH-32962		In prior releases 22 regions were displayed in the State/Region drop-downs throughout the Recruiting application for France. With this release, France's 96 départements display in the State/Regions drop-downs, as well as the country's 5 overseas départments and 8 overseas territorial collectives.
Sort Order for French Department List	OH-35829		When selecting France as the country throughout the Recruiting application, including the career sites, the States/Region drop-downs display the French départments in the correct order.

Resolved issues

Tracking ID	Support Case	Description
OH-35803		We resolved an issue around the CCE Correspondence action on the new Hot Matches page. When the list of 50 Hot Matches results included one or more candidates in the HIRED stage, and those candidates had been selected for the CCE Correspondence action, nothing happened when that action was selected. To prevent this issue, we are now disabling the checkbox for all candidates in the HIRED stage.
OH-35806		We resolved an issue that prevented the pagination buttons from displaying on the Candidate Resume Profile page—if you landed on that page by clicking any candidate name listed on the new Hot Match page.
