Release Notes

2018.1.1

February 2018

New features and improvements

New features and improvements are summarized here. Need more details? Click [here](#).

Name	Tracking ID	Support Case	Description
Internal Career Portals: Add 'Business Unit' as an available column on the job search results page	OH-34805		Clients can have a "Business Unit" column displayed on the Job Search Results page of internal career portals.
External Career Portals: Add 'Business Unit' as an available column on the job search results page	OH-36683		Clients can have a "Business Unit" column displayed on the Job Search Results page of external career portals.
Update State/Region label for French language users	OH-36219		After changing the values in the State drop-down from French Régions to French Départements (OH-32962), we also changed the labels in the user interface.
Create Job Posting menu option added	OH-36792		Create Job Posting link in the Jobs section lets users (with appropriate permission) to start the job creation process.
Change label for Resume & Job Search Advanced Search options	OH-36463		With the last release, we moved the JOBS and the RESUMES link under the Candidate Search and the Jobs Search section respectively. We are now re-labeling those links to read "Advanced Search".

Resolved issues

Tracking ID	Support Case	Description
OH-36510	00742062	Fixed an issue with the two-character state code not feeding over to some vendors for background check requests.
