Release Notes
2019.1.1, 2019.1.2, 2019.1.3, 2019.1.4
January 2019

New features and improvements

2019.1.4

Name	Tracking ID	Support Case	Description
Candidate Experience - Add Resume Text Field option to Configurable Apply	OH-40307		We added a new field option to the configurable application form in Candidate Experience. Admin users now can add a 'Resume / CV Free Text Field' to the application form. When added to the form, it allows the applicant to type or copy and paste their resume text into this field.
Candidate Experience – Archive Live Job Details Page and Presubmission Text	OH-40319		Admin users can now archive a live 'Job Details Page' or live Presubmission Text by clicking on the new ARCHIVE icon on the LIVE tile. This will allow Admin users to return to the default setting for those two options, meaning the default Job Details page, and for Presubmission Text the default setting is, that no Presubmission text is displayed. **Note:** We did not add an ARCHIVE icon to the LIVE tile for the Configurable Application Form because that page has an option for the Admin user to select the 'Quick Apply' option, which is the default option for the application form.
Candidate Experience – Added a VIEW page for Presubmission text	OH-40329		Admin users, when clicking the VIEW icon for a LIVE or ARCHIVED Presubmission Text tile, will now see a VIEW page on which all the functionality is truly disabled, and the text area is grayed out.
Candidate Experience – Show the 'Internal Description' on Archived Tiles	OH-40362		In cases where an internal description was entered for a configured job details page or a configured application form, that description was not displaying on

Name	Tracking ID	Support Case	Description
			the archived tile. We made the improvement to show that description, even after the application form or job details page has been archived.
Candidate Experience – Widen the Margins for the Footer Columns	OH-40504		We widened the margins for each of the for available columns so that column headers or link texts that include longer words display correctly.

2019.1.3

Name	Tracking ID	Support Case	Description
Candidate Experience – Hide Search Filters and Pagination when equal or less than 10 jobs are listed	OH-40325		To keep the Candidate Experience pages as simple and clean looking as possible, the search filter section and pagination are hidden from the Candidate Experience Job Search page if there are 10 jobs or less posted on the career site.

2019.1.2

Name	Tracking ID	Support Case	Description
Candidate Experience – Admin Portal – Remove the Import Application Form functionality	OH-40311		The ability to select the option of importing an application form from existing career portals has been removed. This functionality is no longer needed because you can now configure application forms per career site and language.

Resolved issues

2019.1.4

Tracking ID	Support Case	Description
OH-40524		Fixed an issue with the Candidate Experience career sites where the options the applicant selected as answers to any EEO and/or OFCCP question were not reflected correctly on their EEO/AA profile in the ATS.

2019.1.2

Tracking ID	Support Case	Description
OH-40231		When a user did not include the City, State and Zip code to the company Location in Admin > Company Locations, and then selected a location code when creating a Job Posting without those fields completed, the user could edit the State, type in the City and Zip Code before saving the Job. However, if the Company Location code has a State defaulted, then the City field was still able to be completed by the user but the Zip code field was now grayed out. This was caused by the work done in OH-30583, which was part of the 2017.2 release on April 15, 2017. Each field belonging to the location will get disabled IF that field has a value in the Company Location. If the field in the Company Location is blank, the field will not get disabled. However, for Zip/Postal code, this logic looked at if the State/Region is blank instead of the Zip/Postal code. Fixed the logic to look at Zip/Postal code.
