SilkRoad Recruiting

Release Notes
2019.2
February 2019

New features and improvements

New features and improvements are summarized here. Need more details? Click here.

Name	Tracking ID	Support Case	Description
Candidate Experience - Country available on Recent Jobs Snippet	OH-39974		Country can now be included in the Recent Jobs Snippet. On the General Settings page if *Show Country in Job List* is enabled, country info is added to Recent Jobs Snippet.
Candidate Experience – eForm can now be part of the initial application process	OH-40006		In Candidate Experience, an additional eForm can now be configured to display as part of the initial application process. If configured, after an applicant completes the initial application, the applicant sees an Almost Done page. There the applicant clicks Continue and is routed to the eForm to complete. Also, the applicant is sent a link to the eForm to complete it later, if desired.
Candidate Experience - New setting for managing languages	OH-40010		Language setting is added to Candidate Experience Admin portal. Use it to control the languages to display as configuration options for these settings: • Presubmission Text • Configurable Application Form • Configurable Job Details Page The default language for these settings (which is also the language automatically enabled and marked as the default language on this Language settings page) is the default portal language selected during the initial set-up of the career site. (Default Portal Language drop-down on the General Settings page)

Name	Tracking ID	Support Case	Description
Candidate Experience-Admin-Toggle Switch	OH-40338, OH-40346, OH-40350, OH-40354, OH-40606 OH-40610		Toggle switches replace check boxes for the following settings: • Active, Show Country in Job List on General Settings page • Google Job Postings, Google Analytics on Google Integration Settings page • Cookie Policy Acknowledgement setting • Allow Open Submission on Manage Application Form page • Required setting when adding a field to a configurable application form
Candidate Experience - Admin - Display language name in browser's language	OH-40445		The language names in the Candidate Experience Admin portal now display in the following format: "Language Name in its Language" followed by "(Language Name in Browser's Language)" followed by "[ISO Language Code]"
Candidate Experience - Remove Pagination when search returns 10 or less results	OH-40492		When a job search in Candidate Experience returns only one page of results (10 or less jobs), pagination at bottom of results list is hidden.
Candidate Experience - Google Jobs Integration - Send additional Job Info	OH-40512		Some additional job information will be sent to Google if the Google Job Posting Integration has been enabled for a Candidate Experience career site. This info is only sent to Google if it has been configured to display on the Job Posting Details page of the Candidate Experience career site.

Resolved issues

Tracking ID	Support Case	Description
OH-40315		Resolved an issue where the email address was retained when a candidate clicked the Find Account link, entered an email address, then navigated away from that page, and then navigated back to it. Clearing the email address after validating it resolved the issue.
OH-40500		Resolved an issue where the 'EEO-1 Job Category' and the 'AAP Job Group' were hidden from the create and edit requisition pages but would display in cases where the location was edited.

Tracking ID	Support Case	Description
OH-40681		Resolved an issue where in some instances, when an admin user imported a Candidate Experience career site, the Cookie Policy Acknowledgment banner automatically appeared on that career site without having been enabled for that career site via the setting in the Admin portal. And when a user clicked on the "Go Here" link in that message, it refreshed the page and routed the user back to the job listings page of the Candidate Experience.
