

SilkRoad Recruiting Release Notes v2022.10 | October 14, 2022

New features and improvements

New features and improvements are summarized [here](#).

Module	Release Note	Key	Salesforce Number
ATS Candidate Experience	When posting jobs to third-party job boards via the JobTarget integration, the ATS now sends the Candidate Experience (CX) URL as the Apply URL to JobTarget so that a redirect is no longer needed.	RND-3718	
Candidate Experience	Created a new setting that hides any link or button on a Candidate Experience (CX) career site that routes users to the Candidate Experience (CX) Job List page. This setting is used when the career site is embedded and another job list page exists. This setting can only be enabled by a SilkRoad employee.	RND-3477	
Candidate Experience	When configuring the Job Details Page for Candidate Experience (CX) career sites, Admin users can now select the display format for the job location information on the configured Job Details Page.	RND-4966	

[3 issues](#)

Resolved issues

Module	Release Note	Key	Salesforce Number
ATS	Fixed an issue that occurred when offer approvals were completed from the cards on the Task List page. The attachments selected to be sent with an offer approval were only attached to the email that went out to the first approver when approval was set-up as a sequential approval.	RND-6617	
Candidate Experience	Fixed an issue that caused the Social Media icons on Candidate Experience (CX) career sites to display in specific configuration instances when they should not.	RND-6351	
Candidate Experience	Fixed an issue that caused the Apply with LinkedIn button to display on internal Candidate Experience career sites.	RND-6237
