Resolved issues

Module	Release Note	Key	Salesforce Number
ATS	Fixed an issue where any numbers entered into custom fields for job offers did not display in the correct format. The format is determined by the custom field setup and the locale of the user creating the offer.	RND-6887	
ATS	Fixed an issue that caused hiring managers to see outstanding resume review requests in the 'My Review Requests' column on the jobs page, but then did not find a card on the Task List page for that review. This was due to the fact that when the review request was initiated, the candidate was linked to a different job posting, but was then moved to another job posting after the request.	RND-7070	
ATS	Fixed an issue that caused the eForm Notification Email not to be send to the selected user roles every time an eForm was completed.	RND-6954	00867130
ATS	We fixed an issue around some very specific permission & feature setting combination that when in play caused hiring managers to not be able to view the resume of the candidate, when clicking the 'View Resume' link on the review request card on the Task List page.	RND-7071	

Module	Release Note	Key	Salesforce Number
ATS	Fixed an issue that occurred where some users received an error message, telling them they attempted to access an area they were not authorized to see when attempting to cancel a review request from the 'Reviews Status' Page, accessible via the navigation bar.	RND-7003
