

SilkRoad Recruiting Release Notes v2022.16 | December 5, 2022

New features and improvements

Module	Release Note	Key	Salesforce Number
ATS	Added the ability for users who are initiating offer approval requests to attach any completed eForm that is linked to the candidate profile to the offer approval email so that the approvers can easily review the information on that form.	RND-6333	
ATS	There is a new setting that provides the client administrator the option to restrict a user's SilkRoad username from being used as the password or as part of the password. This setting must be enabled by SilkRoad.	RND-6595	
ATS	There is a new setting that provides the client administrator the option to restrict a user's SilkRoad User ID from being used as the password or as part of the password. This setting must be enabled by SilkRoad.	RND-6596	
ATS	There is a new setting that provides the client administrator the option to restrict a user's email address from being used as the password or as part of the password. This setting must be enabled by SilkRoad.	RND-6597	
ATS	There is a new setting that provides the client administrator the option of deciding how many new passwords the user has to create before a previous password can be reused. This setting must be enabled by SilkRoad.	RND-6600	
ATS	There are new validation messages for the newly available password rules.	RND-6945	
Candidate Experience	The resume parsing engine we have been using for Candidate Experience (CX) career site applications has been replaced with the new a API endpoint that converts a document to text.	RND-6966	
ATS	The Remove Disposition user permission and the Remove Disposition option have been added to the following two places: - The "What would you like to do with this candidate?" drop-down on the Candidate Resume Profile page. - The [Take Action] drop-down on the Resumes Advanced Search page. The option is displayed in these areas for users who are assigned the new Remove Disposition user permission.	RND-7065	

Module	Release Note	Key	Salesforce Number
ATS	Previously, any change in a candidate's disposition was captured under the History tab on the Candidate Resume Profile page using a generic Resume Updated entry. Now, changes to a candidate's disposition are logged using more specific entries. Three new possible entries under the History tab are: - Disposition was changed to "(DispositionName)" - Disposition was changed automatically to "(DispositionName)" due to an enabled setting. - Previously assigned disposition of "(DispositionName)" was removed. As with all other History entries, the name of the user, time and date stamp are also be shown.	RND-7067	
ATS	There is now a new column, Disposition Stage, on the '2007 and up - Candidate OFCCP Affirmative Action EEO Data Extraction' report. This new column displays the name of the hiring stage the candidate resided in when the current disposition that is listed in the 'EEO Disposition' column was assigned to the candidate's profile. If the candidate does not have a disposition assigned yet, then the cell for those candidates are blank.	RND-7068	
ATS	The Disposition drop-down (on the page you see when clicking the EDIT button under the SUMMARY tab of the Candidate Resume Profile page) has been removed. The removal of this option was necessary because changing the disposition in this area could not be tracked and added as one of the new disposition specific history entries created under ticket RND-7065. Going forward, all users with the 'Change Disposition' permission assigned to their user profile can change the disposition from: - The 'What would you like to do with this candidate?' drop-down on the Candidate Resume Profile page. - The [Take Action] drop-down on the RESUMES Advanced Search page.	RND-7069	

11 issues

Resolved issues

Module	Release Note	Key	Salesforce Number
ATS	Fixed an issue where the email letting users know that an offer has been fully approved was being sent via BCC to the last approver. Going forward, these emails will be sent to the the Offer Creator, whose email address will be in the TO line, and the Recruiter, whose email address will be in the CC line.	RND-7164	
ATS	Fixed an issue where the email letting users know that a requisition has been fully approved was being sent via BCC to the last approver. Going forward, these emails will now be sent to the the Job Creator, whose email address will be in the TO line, and the Requisition Admin, whose email address will be in the CC line.	RND-7159
