

SilkRoad Recruiting Release Notes v2022.2 | June 2022

New features and improvements

New features and improvements are summarized here. Need more details? Click [here](#).

Module	Release Note	Key	Salesforce Number
ATS	The reference to 'OpenHire' in emails sent to recruiters when notifications are enabled for a job posting has been changed to 'SilkRoad Recruiting' instead.	RND-1939	
ATS	A new standard report, labeled 'Stage Duration Report' has been added. This report is essentially two reports in one. There is a table that shows the average time applicants resided in each hiring stage during the user-defined date range. In the second table, the user running the report can then break down those numbers by Recruiter, Recruiting Manager, Hiring Manager, Job Postings or Department.	RND-3414	
ATS	We added a new setting, 'Displayed Offer Approval Emails Fields', to the Settings page in SilkRoad Recruiting. This settings lets the system admin user control what offer information is included in the offer approval emails that go out to the selected offer approvers.	RND-3496	
ATS	With this ticket we are deploying new functionality that will provide users the ability to create Evergreen Job Postings. Now those positions that you have available on a constant basis will never looks stale, as a brand new evergreen job is automatically created every time you hire a candidate for the position.	RND-4792	
ATS	We made improvements to make sure that any questions that display on a career site that also has Indeed Apply enabled are also displaying to the applicants if they choose the Indeed Apply option over the regular apply option.	RND-5144	
ATS	New system merge fields have been added to the Offer Letter functionality that allow you to have the hiring manager info populate automatically when the letter is created.	RND-5397	
ATS	The Task List is a new feature introduced in this release. It shows pending tasks for offer and requisition approvals as well as resume reviews. Access the Task List by clicking the Task List icon in the header. (The icon has a bubble that indicates the number of tasks there are to complete.)	RND-5556	

Some things to note:

- Offer and requisition approval or rejection was previously only possible via links in the approval emails. Those emails are still sent, but you now no longer have to depend on those emails only.
- The existing Review Requests page is still available in this release, and you can still do resume reviews there. However, it will be removed in the next release and then the Task List will be the only place you can do resume reviews.

ATS	We made changes to the message that always displayed under the 'Close this job?' field to now include information about the candidates on evergreen job posting whenever the job that is being closed is an evergreen job.	RND-5801
ATS	A new column has been added to the new Evergreen Job Posting report that displays the name of the user who closed each of the evergreen jobs.	RND-5810
Candidate Experience	We made an improvement to the page that displays to applicants who are applying to job postings on a Candidate Experience (CX) career site whenever they submit the Candidate Experience application form but still have to complete the upfront eForm or assessment. This new page clearly conveys that the applicant is only half done with the application process.	RND-5412

10 issues

Resolved issues

Module	Release Note	Key	Salesforce Number
ATS	Fixed an issue that would allow users to edit the fields that were locked down via the Locked Job Template Fields setting when editing a job posting that was initially created using a job template.	RND-5263	
ATS	Fixed an issue that caused the Last Modified column on the Jobs Advanced Search page to be blank for all jobs.	RND-5718	
ATS	Fixed a bug that caused the 'Require eForm Submission' to be set to YES when cloning a job posting even though on the job that was being cloned, that setting was set to NO.	RND-5964
